

Blöber fender model L

Dimensions:

H	35 mm
L	965 mm
W	125 mm
A	50 mm

Material Performance Characteristics

UV Resistance

- The material is highly resistant to ultraviolet (UV) degradation, ensuring long-term durability and performance in outdoor and marine environments.

Surface Properties

- Features a skid-resistant and slip-resistant surface texture, enhancing safety in wet and dynamic conditions.

Chemical Resistance

- Exhibits strong resistance to a wide range of chemicals, including most solvents, alkalis, and even strong acids.

Note: Limited resistance to certain concentrated acids and strong oxidizers (e.g., hydrogen peroxide) – compatibility should be confirmed for specific applications.

Mechanical and Physical Properties

Property	Value	Test Standard
Water Transmission Rate	$W < 0.1 \text{ kg/m}^2\cdot\text{h}^{0.5}$	EN 1062-3
Abrasion Resistance	< 300 mg loss	EN 5470-1
Impact Resistance	Class III	EN 6272-1
Tensile Strength	> 15 MPa	ASTM D638
Reaction to Fire Classification	Class E	TS EN 13501-1
